

Copier RFP 2021-017 Questions and Answers

Posted 12/8/2021

Q. Your current vendor offers speeds of 45 and 55 pages per minute where we offer speeds of 40, 50, etc. You're RFP requests us to make our response based on volume which in some cases we may choose to quote a 40 or in other cases a 50 as a replacement to a 45?

A. Ranges of 40-50 PPM would be within our expectations.

Q. Staple finishers are described as floor finishers. Floor finishers to us are larger staple devices that adjoin to the left side of the main device instead of being embedded into the main device. Is it acceptable to offer inner finishers where it seems applicable?

A. You may want to include the finisher in your proposal with a second recommended option for an inside stapler and define the potential cost savings.

Q. Are you currently on the NSPO contract?

A. Inspire is currently a NASPO member.

Q. Will there be some flexibility of the timing of the implementation period depending on the availability of getting equipment in?

A. Inspire understands the Supply Chain Conditions and will work with the selected vendor on addressing delays.
